

SUMIT SAINI

SOC ANALYST L1 | SECURITY OPERATIONS & BLUE TEAM

Amroha, Uttar Pradesh | +91 7817033430 | Sumit70377855@gmail.com

Portfolio: sumitsaini-sec.github.io | [GitHub: sumitsaini-sec](https://github.com/sumitsaini-sec) | [LinkedIn: sumit-sec125](https://www.linkedin.com/in/sumit-sec125)

PROFESSIONAL SUMMARY

SOC Analyst L1 candidate with cybersecurity internship experience and hands-on labs in alert triage, SIEM log analysis, phishing investigation and network traffic analysis. Builds Python security tools and uses AI-assisted scripting and documentation to accelerate routine project work.

TECHNICAL SKILLS

SOC operations: Security monitoring, alert triage, event correlation, TP/FP/BP classification, incident documentation, evidence-based escalation

Investigation: Windows Event Logs, Sysmon, phishing analysis, indicators of compromise (IOCs), network traffic analysis, MITRE ATT&CK fundamentals

Tools: Splunk SIEM (lab), Wireshark, Nmap, Nikto, Python, Scapy, Git/GitHub

Systems and networking: Windows, Linux, VMware, TCP/IP, DNS, HTTP/HTTPS; EDR concepts

PROJECTS

Sentinel Desk SOC Investigation Lab | Personal project | [GitHub](#)

- Built a SOC training application with 600 synthetic alerts and linked identity, endpoint, network and email evidence.
- Added evidence bookmarks, investigation worksheets, saved case status and analyst handoffs.

Incident Response Simulation | Alfido Tech task | [GitHub](#)

- Analyzed 56 synthetic Windows/Sysmon-style events with Python; correlated failed and successful logons with PowerShell, DNS and network activity.
- Documented five evidence-linked findings, a timeline, scope gaps and a proposed response plan.

Network Reconnaissance and Vulnerability Assessment | [GitHub](#)

- Used Nmap and Nikto in an isolated VMware/Kali/Metasploitable lab; documented exposed services, web-server weaknesses and remediation recommendations.

Packet Sniffer and ARP Spoofing Detector | [GitHub](#)

- Built a passive Python/Scapy tool to parse network traffic, flag IP-to-MAC mapping changes and export packet logs and JSON session reports.

INTERNSHIP EXPERIENCE

Cybersecurity Intern | **Skillfied Mentor** | Jul 2026 - Aug 2026

- Developed Python security utilities, completed guided defensive exercises using Kali Linux, and documented commands, findings and task outcomes.

Cybersecurity Intern | **Alfido Tech** | 3-month internship

- Completed practical network-security, packet-analysis and incident-response tasks; published lab evidence and structured reports in GitHub.

EDUCATION

Bachelor of Computer Applications (BCA) - Cyber Security & AI

Teerthanker Mahaveer University, Moradabad | 2024 - 2027 (expected)

TRAINING AND JOB SIMULATIONS

Mastercard Cybersecurity Job Simulation | Forage | Jun 2026

Deloitte Australia Cyber Job Simulation | Forage | Mar 2026
