PROFESSIONAL SUMMARY

Cybersecurity & AI student with two internship engagements and hands-on Blue Team experience in alert triage, log and network-traffic analysis, phishing investigation, IOC review, vulnerability scanning, and incident documentation. Built a SOC L1 investigation dashboard and an isolated Windows-Kali-Metasploitable lab for MITRE ATT&CK-aligned analysis. Hands-on with Wireshark, Nmap, Kali Linux, Sysmon, and Python, with working knowledge of Splunk; ready to support SOC operations.

EXPERIENCE

SkillFied Mentor

Jul 2026 - Aug 2026

Cybersecurity Intern

2 months

- Built Python-based security utilities and used Kali Linux to complete guided defensive-security exercises.
- Documented commands, findings, and task outcomes in structured reports to support repeatable troubleshooting.

Alfido Tech

3-month internship

Cybersecurity Intern

- Completed assigned cybersecurity modules and practical lab tasks covering network security, threat analysis, and incident-response fundamentals.
- Developed the lab foundation for an incident-response simulation using Windows 11, Kali Linux, Metasploitable, and Sysmon telemetry.

TECHNICAL SKILLS

SOC Operations: Alert Triage, Security Monitoring, Log Analysis, Phishing Analysis, IOC Review, Incident Documentation, Endpoint Investigation

Security Tools: Wireshark, Nmap, Splunk (Basic), Kali Linux, Sysmon, VMware Workstation, Metasploit (Lab), Python

Networking & Frameworks: TCP/IP, DNS, HTTP/HTTPS, Windows, Linux, Active Directory (Basic), Firewalls, MITRE ATT&CK, Cyber Kill Chain, Threat Intelligence Fundamentals

PROJECTS & LAB EXPERIENCE

SOC L1 Alert Investigation Dashboard

Personal Project

- Developed a local practice dashboard with varied simulated security alerts and investigation fields for source IP, affected endpoint, severity, timeline, and evidence.
- Added new-alert creation and persistent case status to support repeatable triage, escalation decisions, and incident tracking.

Isolated SOC Home Lab

Personal Lab

Tools: VMware | Windows 11 | Kali Linux | Metasploitable | Sysmon

- Built an isolated 192.168.100.0/24 lab with a Windows endpoint, Kali workstation, and Metasploitable target; verified connectivity while keeping vulnerable systems off the public network.
- Practiced packet and log review, DNS/IP troubleshooting, controlled reconnaissance, IOC identification, and MITRE ATT&CK-aligned investigation workflows.

Cybersecurity Practice Labs

TryHackMe & Forge

- Analyzed phishing indicators, authentication events, PCAP/network traffic, and simulated incidents using Wireshark and Nmap; documented findings and response actions.

EDUCATION

Bachelor of Computer Applications (BCA) - Cyber Security & AI

2024 - 2027

Teerthanker Mahaveer University, Moradabad, Uttar Pradesh

CERTIFICATIONS

Mastercard - Cybersecurity Job Simulation | Forge

Jun 2026

Deloitte Australia - Cyber Job Simulation | Forge

Mar 2026

CORE STRENGTHS

Analytical Thinking | Technical Documentation | Team Collaboration | Clear Communication | Quick Learning | Defensive Mindset
